## **DETAILED ACTION**

### ***Response to Amendment***

The amendment filed on October 21, 2005 has been considered but is ineffective to overcome the prior art reference.

### ***Drawings***

The drawings were received on October 21, 2005. The drawings are hereby objected to, see the Notice of Draftperson's review, herein attached.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bradley (4,679,607) in view of Basta (6,318,929) as set forth in previous Office Action.

As to the limitation of a guide structure directing the pair of hydraulic cylinder to operate in a proper orientation, it is obvious that Bradley's housing (12) and linear connections (22, 65; fig. 2) guide the cylinder (50) so as to operate in a proper orientation, i.e., Bradley's disclosure of a supporting frame (20) and cylinder connections (22, 65) ensure linear operation of the cylinder (50), thus operation in a proper orientation.

***Allowable Subject Matter***

Claims 8-19 are deemed allowable.

Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: As noted in the previous Office Action, the prior art of record does not disclose or fairly suggest *at least a pair of guide rods or a pair of guide tubes* as set forth in claims 5, 6, 8 and 14. For the reasons noted in the previous Office Action, claims 5, 6, 8-19 are deemed allowable.

Neither the prior art of record nor any combination thereof discloses the claimed invention as set forth in claims 5, 6, and 8-19. Accordingly, claims 5 and 6 contain allowable subjected matter and claims 8-19 are deemed allowable over the prior art of record.

***Response to Arguments***

Applicant's arguments filed October 31, 2005 have been carefully considered but they are moot in view of the rejection recited above.

Applicant's remarks are drawn to the failure of prior art reference, Bradley to disclose a guide structure. This argument however is not deemed persuasive because, as noted above, Bradley's housing (12) serves to guide the cylinder (50) in a linear manner, thus, "*a guide structure...operating in a proper orientation*". Accordingly, the remarks are not deemed persuasive.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
